---

Hi Lon,

I just listened to your voice mail. Craig had asked me about what room: here is my thinking. First off, thank you for offering meeting space to Ecology. Rooms at our offices were not available on the dates chosen.

I don't think stadium seating is a good idea. This is intended as a discussion, which is tough in stadium style set ups. I am expecting between 10 and 15 people, maybe 20, sitting around a table, perhaps in a U shape, with room for a small audience. This is intended as a technical discussion on specific technical statistics, math, calculation method issues, so I wouldn't expect a big turnout. (But because it's the topic it is, I have some uncertainty about that.)

Do we need to talk more about this? (I have cc'd Elaine Heim who is assisting coordinating from this end with facilitator Angie Thompson of Envirolssues - in case you can't reach me or Craig and need a quick answer about something.) Again, many thanks.

Martha
